- **Innodata -** 2021 April - October

PROJECTS

BoQ Master - BoQ Generating Web Application

In the digital age, I led a transformative project in construction, addressing cost determination challenges through a pioneering Bill of Quantities (BoQ) system. By combining React and PHP, the solution delivers detailed insights into material quantities, specifications, and costs. This project showcases my commitment to leveraging technology for precise cost estimation, highlighting proficiency in React and PHP development.

- React, PHP

Lockit - Bicycle Security System

Our pioneering bicycle security system, a Figma prototype developed with diligence, seamlessly integrates physical and digital safeguards. Combining fingerprint authentication, GPS tracking, and LTE communication, this project revolutionizes urban commuting. It's a testament to our commitment to enhancing security and convenience for cycling enthusiasts

- Android Studio, Kotlin, Arduino, React, Node js, Figma

BIDWIZ2.0 - Auction Site

BidWiz is an online auction website that provides a platform for users to bid on a wide range of products and items.

- React, Tailwind CSS, Django

TOKEN G10 - Token Generating APP

Amidst Sri Lanka's severe economic crisis, exacerbated by a foreign currency shortage leading to increased prices and inflation, our project, Token G07, provides a crucial solution. Focused on alleviating the impact of fuel shortages, it streamlines queues, minimizing disruptions to daily life, and addressing the urgent need for efficient fuel distribution in the community.
